Part I Financial Statements

Report of Independent Auditors

To the Board of Trustees of The General Hospital Corporation

In our opinion, the accompanying balance sheets and the related statements of operations, changes in net assets and cash flows present fairly, in all material respects, the financial position of The General Hospital Corporation at September 30, 2008 and 2007, and the results of its operations, its changes in net assets and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of The General Hospital Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 19, 2008 on our consideration of The General Hospital Corporation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters for the year ended September 30, 2008. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying Schedule of Expenditures of Federal Awards for the year ended September 30, 2008 is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects, in relation to the basic financial statements taken as a whole.

The accompanying notes are an integral part of these financial statements.

(dollars in thousands)

1. Organization and Community Benefit Commitments

The General Hospital Corporation (General) operates an acute-care general hospital established to provide healthcare services to patients primarily from the Greater Boston area as well as New England and beyond. In addition, the General conducts research and provides education for physicians and other healthcare professionals. As such, operating revenue includes those generated from direct patient care and reimbursement of research. The Massachusetts General Hospital (MGH) is the sole member of the General, McLean HealthCare, Inc., Massachusetts General Physicians Organization, Inc. (MGPO), Nantucket Cottage Hospital, Martha's Vineyard Hospital, The MGH Institute of Health Professions, Inc., and The MGH Health Services Corporation.

Partners HealthCare System, Inc. (PHS) is the sole member of MGH, Brigham and Women's/Faulkner Hospitals, Inc. (BW/F), NSMC Healthcare Inc., Newton-Wellesley Health Care System, Inc., Partners Continuing Care, Inc., Partners Harvard Medical International, Inc. and Partners International Medical Services, LLC. PHS appoints the two physicians who are the members of Partners Community HealthCare, Inc. PHS, together with all of its affiliates, is referred to as "Partners HealthCare."

The General is a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code.

Community Benefit

The General collaborates with community and hospital partners to build and sustain healthier communities, and to enhance the General's responsiveness to patients and community members from diverse cultural and socioeconomic backgrounds. As such, the General engages in several mission-related activities aimed at maintaining its tax-exempt status. These activities include supporting a broad-based community benefits program, operating essential clinical services, including an emergency room and outpatient clinics serving low-income patients, and providing free or discounted care, in conjunction with a clear charity care policy based on community needs.

The Massachusetts Attorney General's Community Benefits Guidelines require health maintenance organizations and nonprofit acute care hospitals to prepare annual reports documenting the status and level of their community benefit programs and initiatives. These annual reports serve the important purpose of providing the public with access to useful information about these programs and initiatives. The General has a community benefit planning and service delivery structure and has filed its report separately with the Attorney General.

The General's community benefit program also includes career and workforce development, encouraging students to pursue nursing and other clinical careers, youth substance abuse prevention, and domestic violence intervention. In addition, several community health centers are licensed or affiliated with the General, providing patient access to the General and other Partners HealthCare hospitals. The General invests in these health centers' infrastructure, programming and operation and also helps with relocation, renovation, and other capital requirements.

(dollars in thousands)

Uncompensated Care

The General provides care to all patients regardless of their ability to pay. The cost of providing that care is reflected in the statements of operations. The cost related to those patients, for which the General receives either partial or no reimbursement for healthcare services provided, is summarized as follows:

State Programs

Uncompensated Care

Free care services are partially reimbursed to acute hospitals through the statewide Health Safety Net (HSN, formerly Uncompensated Care Pool) established by the Massachusetts Health Care Reform Law (Chapter 58 of the Acts of 2006). A portion of the funding for HSN is paid by hospitals through a statewide hospital assessment levied each year by the Massachusetts Legislature. All acute care hospitals in the state are assessed their share of this total statewide hospital assessment amount (\$160,000 in 2008 and 2007) based on each hospital's charges for private sector payers. The General reports this assessment as a deduction from net patient service revenue.

Hospitals are reimbursed for free care based on claims for eligible patients that are submitted to, and adjudicated by the HSN. Rates of payment are based on Medicare rates and payment policies. Hospitals with a high proportion of free care and government funding receive more favorable reimbursement. In aggregate, the General's share of uncompensated care funding covered 72% of the estimated cost of free care provided in 2008 and 67% of the estimated cost in 2007, excluding the assessment.

Medicaid

Medicaid is a means-tested health insurance program, jointly funded by state and federal governments. States administer the program and set rules for eligibility, benefits and provider payments within broad federal guidelines. The program provides health care coverage to low-income children and families, pregnant women, long-term unemployed adults, seniors and persons with disabilities. Eligibility is determined by a variety of factors, which include income relative to the federal poverty line, age and immigrant status, and assets.

Medicaid payments to the General do not cover the cost of services provided. In aggregate, reimbursement from Medicaid covered 81% of the estimated cost of services provided in 2008 and 73% of the estimated cost in 2007.

Federal Program

Medicare

Medicare is a federally sponsored health insurance program for people age 65 or older, under age 65 with certain disabilities, and any age with End-Stage Renal Disease. For many years, Medicare payments have not kept pace with increases in the cost of care provided for many hospitals. Additionally, payments to physicians have seen little or no increases over the past several years. Compounding this shortfall in payments is the shift of care from higher paying inpatient services to lower paying outpatient services.

Consequently, Medicare payments to the General also do not cover the cost of services provided. In aggregate, reimbursement from Medicare covered 78% of the estimated cost of services provided in 2008 and 79% of the estimated cost in 2007.

(dollars in thousands)

For free care, Medicaid and Medicare, the total estimated cost of services provided by the General exceeds the net reimbursement received under these programs by \$185,086 and \$195,058 for the years ended September 30, 2008 and 2007, respectively. The following summarizes, by program, the cost of services provided, net reimbursement and cost of services in excess of reimbursement for each year:

	Years Ended September 30, 2008 2007			
Cost of services provided Free Care, including assessment payment to HSN of \$19,404 and \$19,080 in 2008 and 2007, respectively Medicaid Medicare	\$ 55,274 185,248 542,797	\$	73,989 176,600 511,612	
	\$ 783,319	\$	762,201	
Net reimbursement				
Free Care Medicaid Medicare	\$ 25,940 150,599 421,694	\$	36,723 128,120 402,300	
	\$ 598,233	\$	567,143	
Cost of services in excess of reimbursement				
Free Care Medicaid Medicare	\$ 29,334 34,649 121,103	\$	37,266 48,480 109,312	
	\$ 185,086	\$	195,058	

Bad Debts

In addition to free care and inadequate funding from the Medicaid and Medicare programs, there are significant losses related to self-pay patients who fail to make payment for services rendered or insured patients who fail to remit co-payments and deductibles as required under the applicable health insurance arrangement. The provision for bad debts of \$22,282 in 2008 and \$33,295 in 2007 represents charges for services provided that are deemed to be uncollectible. The estimated cost of providing these services was approximately \$7,620 and \$11,220 for 2008 and 2007, respectively.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting. The General follows the accounting policies and practices of PHS and these statements should be read in conjunction with the Partners HealthCare consolidated financial statements.

(dollars in thousands)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates are made in the areas of patient accounts receivable, research grants receivable, investments, receivables and accruals for settlements with third-party payers, accrued professional liability, accrued compensation and employee benefits, and accrued other.

Fair Value of Financial Instruments

The fair value of financial instruments approximates the carrying amount reported in the balance sheets for cash and equivalents, investments, investments limited as to use, interest in the net assets of MGH, patient accounts receivable, research grants receivable, pledges receivable and accounts payable, except for long-term obligations which is disclosed in Note 6.

Cash and Equivalents

Cash and equivalents generally represent money market and highly liquid debt instruments with a maturity at the date of purchase of three months or less.

Investments

The General holds investments which represent units in a partnership (Note 3) and are recorded on the equity method of accounting, with the change in net unrealized appreciation included in excess of revenues over expenses as a component of income from investments. Separately invested investments (marketable investments) are measured at fair value, generally based on quoted market prices, with the change in net unrealized appreciation excluded from excess of revenues over expenses.

Income from investments (including realized gains and losses, change in net unrealized appreciation on equity method investments, interest, dividends, and endowment income distributions) is included in excess of revenues over expenses unless the income or loss is restricted by donor or law. Income from investments is reported net of investment related expenses.

Investments with unrealized depreciation are reviewed each quarter to determine whether these investments are other-than-temporarily impaired. This review considers factors including the anticipated holding period for the investment and the extent and duration of below cost valuation.

A write-down in the cost basis of securities is recorded when the decline in fair value of certain investments below costs has been judged to be other-than-temporary. Depending on any donor-imposed restrictions on the underlying investments, the amount of the write down is reported as a realized loss in either temporarily restricted net assets or in excess of revenues over expenses as a component of income from investments, with no adjustment in the cost basis for subsequent recoveries in fair value.

Partners HealthCare has an endowment spending policy for pooled endowment funds. A fixed distribution rate for spending is determined each year which will come from either income and/or net accumulated gains in fair value.

(dollars in thousands)

Investments Limited as to Use

Investments limited as to use primarily include assets whose use is contractually limited by external parties and assets set aside by the Board of Trustees (or management) for identified purposes, over which the Board (or management) retains control and may, at its discretion, subsequently use for other purposes. Certain investments corresponding to deferred compensation are accounted for such that all income and appreciation (depreciation) is recorded as a direct addition (reduction) to the asset balance and corresponding liability balance.

Patient Accounts Receivable

The General receives payments for services rendered from federal and state agencies (under the Medicare and Medicaid programs), managed care payers, commercial insurance companies, and patients. Patient accounts receivable are reported net of contractual allowances and reserves for denials, uncompensated care, and doubtful accounts. The level of reserves is based upon management's assessment of historical and expected net collections, business and economic conditions, trends in federal and state governmental and private employer health care coverage and other collection indicators.

Research Grants Receivable

The General receives research funding from departments and agencies of the U.S. Government, industry and corporate sponsors, and other private sponsors. Research grants receivable include amounts due from these sponsors of externally funded research. The amounts have been billed or are billable to the sponsor, or in limited circumstances, represent accelerated spending in anticipation of future funding. Research grants receivable are reported net of reserves for uncollectible accounts.

Interest in the Net Assets of The Massachusetts General Hospital

MGH holds investment assets for the benefit of the General. Since MGH is the sole member of the General, these organizations are financially interrelated. Accordingly, the General recognizes its interest in the net assets of MGH and adjusts that interest for its share of the changes in the net assets of MGH. Changes due to gifts, investment income (including realized gains and losses) and unrealized appreciation and depreciation are recognized in nonoperating activity.

Property and Equipment

Property and equipment is reported on the basis of cost less accumulated depreciation. Donated items, exclusive of transfers from related organizations, are recorded at fair value at the date of contribution. All research grants received for capital are recorded in the year of expenditure as a change in net assets. Property and equipment is reviewed for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. Depreciation of property and equipment is calculated by use of the straight-line method at rates intended to depreciate the cost of assets over their estimated useful lives, which generally range from three to forty years. Interest costs incurred on borrowed funds during the period of construction of capital assets are capitalized, net of any interest earned, as a component of the cost of acquiring those assets.

Asset Retirement Obligations

Asset retirement obligations, reported in accrued other, are legal obligations associated with the retirement of long-lived assets. These liabilities are initially recorded at fair value and the related asset retirement costs are capitalized by increasing the carrying amount of the related assets by the same amount as the liability. Asset retirement costs are subsequently depreciated over the useful lives of the related assets. The General records changes in the liability resulting from the

(dollars in thousands)

passage of time and revisions to either the timing or the amount of the original estimate of undiscounted cash flows. The General reduces these liabilities when the related obligations are settled.

Other Assets

Other assets consist of long-term receivables and deferred financing costs. Deferred financing costs are amortized over the terms of the related obligations. The carrying value of other assets is reviewed if the facts and circumstances suggest that it may be impaired.

Compensated Absences

In accordance with formal policies concerning vacation and other compensated absences, accruals of approximately \$52,388 and \$48,221 were recorded as of September 30, 2008 and 2007, respectively.

Unexpended Funds on Research Grants

Research grants received in advance of corresponding grant expenditures are accounted for as a direct addition to investments limited as to use and unexpended funds on research grants.

Self-Insurance Reserves

The General is self-insured for employee healthcare, disability, workers' compensation and certain other employee benefits. These costs are accounted for on an accrual basis to include estimates of future payments for claims incurred.

Net Assets

Permanently restricted net assets include only the historical dollar amounts of gifts which are required by donors to be permanently retained. Temporarily restricted net assets include gifts, and income and gains on permanently restricted net assets which can be expended but for which restrictions have not yet been met. Such restrictions include purpose restrictions where donors have specified the purpose for which the net assets are to be spent, or time restrictions imposed by donors or implied by the nature of the gift (capital projects, pledges to be paid in the future, life income funds) or by interpretations of law (gains available for appropriation but not appropriated in the current period). Unrestricted net assets include all the remaining net assets of the General. See Note 12 for further information on the composition of restricted net assets.

Realized gains and losses are classified as unrestricted net assets unless they are restricted by the donor or law. Unless permanently restricted by the donor, realized gains and unrealized net appreciation on permanently restricted gifts are classified as temporarily restricted until appropriated for spending by the General in accordance with policies established by Partners HealthCare and the Massachusetts Management of Institutional Funds Act. Net losses on permanently restricted endowment funds are classified as a reduction to unrestricted net assets until such time as the fair value exceeds book value.

Gifts and Grants

Unconditional promises to give cash and other assets to the General are reported at fair value at the date the promise is received. Conditional promises to give are recognized when the conditions are substantially met. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. Donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted gifts in the accompanying financial statements.

(dollars in thousands)

Gifts of long-lived assets with explicit restrictions that specify use of assets and gifts of cash or other assets that must be used to acquire long-lived assets are reported as additions to temporarily restricted net assets if the assets are not placed in service during the year.

Grants and contracts normally provide for the recovery of direct and indirect costs, subject to audit. The General recognizes revenue associated with direct and indirect costs as direct costs are incurred. The recovery of indirect costs is based on predetermined rates for U.S. Government grants and contracts and negotiated rates for other grants and contracts.

Statement of Operations

All activities of the General deemed by management to be ongoing, major and central to the provision of healthcare services, training and research activities are reported as operating revenue and expenses. Other activities are deemed to be nonoperating and include unrestricted gifts (net of fund-raising expenses) and substantially all income from investments.

The General recognizes changes in third-party payer settlements and other estimates in the year of the change in estimate. For the years ended September 30, 2008 and 2007, adjustments to prior year estimates resulted in an increase (decrease) to income from operations of \$18,902 and (\$2,022), respectively.

The statements of operations include excess of revenues over expenses. Changes in unrestricted net assets which are excluded from excess of revenues over expenses include change in unrealized appreciation on marketable investments, transfers of assets to and from affiliates, contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for acquisition of such assets) and change in funded status of defined benefit plan.

Net Patient Service Revenue

The General maintains agreements with the Centers for Medicare and Medicaid Services (CMS) of the United States Department of Health and Human Services (DHHS) under the Medicare Program, The Commonwealth of Massachusetts under the Medical Assistance Program (Medicaid) and various managed care payers that govern payment to the General for services rendered to patients covered by these agreements. The agreements generally provide for per case or per diem rates or payments based on discounted charges for inpatient care and discounted charges or fee schedules for outpatient care. Certain "pay for performance" contracts also provide for payments that are contingent upon meeting agreed upon quality and efficiency measures.

Net patient service revenue is reported at estimated net realizable amounts from patients, third-party payers, and others for services rendered and includes estimated retroactive revenue adjustments due to future audits, reviews and investigations. Retroactive adjustments are considered in the recognition of revenue on an estimated basis in the period the related services are rendered, and such amounts are adjusted in future periods as adjustments become known or as years are no longer subject to such audits, reviews and investigations. Contracts, laws and regulations governing the Medicare, Medicaid, and the HSN programs (Note 1) and managed care payer arrangements are complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. A portion of the accrual for settlements with third-party payers has been classified as long-term because such amounts, by their nature or by virtue of regulation or legislation, will not be paid within one year.

(dollars in thousands)

Charity Care

The General provides either full or partial charity care to patients who cannot afford to pay for their medical services based on income and family size. Charity care is generally available to qualifying patients for medically necessary services. The General reports certain bad debts related to emergency services as charity care. Charity care is reported at gross charges with an offsetting allowance, as there is no expectation of collection. Accordingly, there is no net patient service revenue related to charity care.

Other Revenue

Other revenue includes royalty income, cafeteria sales, rental income, parking income, and certain outpatient pharmacy income.

Reclassifications

Certain amounts in the 2007 financial statements have been classified to conform with the 2008 presentation. Direct academic and research revenue and direct academic research expenses have been reduced by \$13,161 for the year ended September 30, 2007 to reflect the elimination of intercompany research activity.

3. Investments and Investments Limited as to Use

Investments are either separately invested or included in pooled investment funds. The Partners HealthCare System Pooled Investment Accounts (Partnership) is structured as a single general partnership composed of four investment pools, with PHS and substantially all of its affiliates participating in the pools as partners. Each partner's interest in the Partnership is based on its underlying investments in one or more of the four separate pools. Amounts included in the investment pools are accounted for using the fair value method whereby each partner is assigned a number of units based on the fair value of the assets of a pool at the time of entry of the funds into the pool. Current fair value is used to determine the number of units allocated to additional amounts placed in a pool and to value withdrawals from a pool. Income from investments of the pools, including realized gains and losses, is allocated on a unitized basis to a partner based on the partner's share of units in a pool.

The Partnership participates in a securities lending program with its custodian bank whereby securities are loaned to qualified financial institutions in exchange for collateral. Investments that have been loaned to another institution are reported as pledged assets in the consolidated balance sheets of Partners HealthCare. Cash or investments received as collateral on the securities lending transaction are also reported as assets in such consolidated balance sheets. Because the collateral must be returned in the future, a corresponding liability is reported in such consolidated balance sheets.

(dollars in thousands)

Subsequent to September 30, 2008 the U.S. and global financial markets have experienced significant volatility and illiquidity, due in part, to current economic conditions and declines in the financial sector. The General's investment portfolio has experienced similar negative volatility. However, the General has been able to maintain its liquidity and its operations have not been significantly impacted.

Investments and investments limited as to use are recorded in the balance sheet as follows:

	September 30,			
		2008		2007
Current assets				
Investments	\$	2,108	\$	2,412
Current portion of investments limited as to use		77,279		69,835
		79,387		72,247

Total investment activity included in excess of revenues over expenses	\$	(1,736)	\$	6,505	

4. Pledges Receivable

Pledges receivable represent unconditional promises to give and are net of allowances for uncollectible amounts. Pledges are recorded at the present value of their estimated future cash flows. Pledges collectible within one year are classified as other current assets and total \$30,750 and \$24,177 as of September 30, 2008 and 2007, respectively. Estimated cash flows due after one year are discounted using published treasury bond and note yields that are commensurate with estimated collection risks. The blended discount rate was 2.4% and 4.1% for 2008 and 2007, respectively. Pledges are expected to be collected as follows:

	September 30,				
	2008			2007	
Amounts due					
Within one year	\$	41,356	\$	31,464	
In one to five years		52,633		30,322	
In more than five years		3,771		5,203	
Total pledges receivable		97,760		66,989	
Less: Unamortized discount		3,681		4,781	
		94,079		62,208	
Less: Allowance for uncollectibles		18,044		9,181	
Net pledges receivable	\$	76,035	\$	53,027	

(dollars in thousands)

5. Property and Equipment

Property and equipment consists of the following:

	September 30,				
Land and land improvements Buildings and building improvements Equipment Construction in progress	2008			2007	
•	\$	3,785	\$	3,785	
Buildings and building improvements		1,161,797		1,091,760	
Equipment		355,576		344,035	
Construction in progress		170,937		92,416	
		1,692,095		1,531,996	
Accumulated depreciation		(683,636)	_	(611,076)	
Property and equipment, net	\$	1,008,459	\$	920,920	

Interest costs, net of interest earned, aggregating \$3,282 were capitalized in 2008. No interest was capitalized in 2007.

Depreciation expense for the years ended September 30, 2008 and 2007 was \$107,380 and \$98,281, respectively.

For the years ended September 30, 2008 and 2007, fully depreciated assets with an original cost of \$34,820 and \$148,797, respectively, were written off.

(dollars in thousands)

6. Long-Term Obligations

Long-term obligations consist of the following:

	September 30,			
		2008		2007
Notes payable to PHS Partners HealthCare Capital Framework Loan, variable interest rate of 4.88% and 5.10% at September 30, 2008 and 2007, respectively, final maturity in 2038	\$	350,886	\$	311,485
Massachusetts Health and Educational Facilities Authority (Authority) Revenue Bonds MGH issue				
Series F, average interest rate of 6.25%, final maturity in 2012 Partners HealthCare System issue Series P, variable interest rate of 8.17% and 3.87% at September 30, 2008 and 2007, respectively,		29,527		35,771
final maturity in 2012		2,391		2,906
		382,804		350,162
Less current portion		25,475		22,615
	\$	357,329	\$	327,547

The Partners HealthCare Capital Framework Loan bears interest at a variable rate based upon the weighted average cost of Partners HealthCare's debt, reset annually, effective October 1.

The Authority issued \$150,000 of Revenue Bonds, Capital Asset Program, Series P to PHS, from which a \$100,000 loan commitment was made to PHS and \$25,000 loan commitments were made to both The Brigham and Women's Hospital, Inc. (BWH) and the General. Under the Capital Asset Program, qualified PHS affiliates may borrow funds to finance eligible projects. Loan repayments are expected to be recycled throughout Partners HealthCare until final bond maturity in 2027. The Series P loan to the General is collateralized by a lien on the unrestricted gross receipts of the General and MGH on a parity with their outstanding indebtedness.

Partners HealthCare Series 2007 Taxable Bonds and the Authority's Series A, B, C, D, E, F, G and H Bonds issued on behalf of Partners HealthCare and the Series P loan to PHS are unsecured general obligations of PHS, supported by guarantees from BW/F, BWH, MGH and the General which may be suspended under certain conditions. The MGH and the General guarantees are collateralized by a lien on their unrestricted gross receipts on a parity with their outstanding indebtedness.

The MGH Series F Revenue Bonds are collateralized by a lien on the unrestricted gross receipts of the General and MGH. The General is jointly and severally liable with MGH for the total amount of the Series F Revenue Bonds, portions of which have been recorded directly by MGH and Spaulding Rehabilitation Hospital (Spaulding). MGH was formerly the sole corporate member of Spaulding.

(dollars in thousands)

The Authority Revenue Bond Agreements contain certain covenants, including a minimum debt service coverage ratio and limitations on additional indebtedness and asset transfers.

Aggregate maturities and payments of long-term obligations during the next five years are as follows: 2009 - \$25,475; 2010 - \$24,373; 2011 - \$25,806, 2012 - \$28,457 and 2013 - \$21,095.

The fair value of long-term obligations was approximately \$385,062 and \$354,577 as of September 30, 2008 and 2007, respectively. The fair value is estimated based on quoted market prices for the same or similar issues.

Interest expense approximates interest paid, net of capitalized interest, during the years ended September 30, 2008 and 2007.

7. Commitments

Leases

The General has noncancelable operating leases for certain buildings and equipment including operating leases for certain office and research space between the General and Massachusetts Biomedical Research Corporation (MBRC). Minimum future lease commitments under noncancelable leases, including a total commitment of \$433,143 on the MBRC leases, for the next five years and thereafter are as follows:

	perating Leases
2009	\$ 91,062
2010	84,336
2011	77,468
2012	74,626
2013	73,955
Thereafter	 512,510
Total lease payments	\$ 913,957

Two of the lease agreements with MBRC provide for scheduled rent increases which are being recognized on a straight-line basis over the remaining lease term. Rental expense under operating leases approximated \$87,657 in 2008 and \$85,631 in 2007, including expense under the MBRC leases of \$43,014 and \$43,041 in 2008 and 2007, respectively.

(dollars in thousands)

MBRC is a related party but is not controlled by the General, and therefore not consolidated within these financial statements. MGH guarantees the payment by the General of certain obligations under the MBRC leases. The President of MGH, or his designee, serves ex-officio as one of three members on the Board of Trustees of MBRC. A significant portion of MBRC's operating results are generated from the operating leases with the General. Summarized financial data for MBRC as of and for the years ended September 30, 2008 and 2007 is as follows:

	Years Ended September 30,			
	2008		2007	
Total operating revenue Total operating expenses Income from operations	\$ 44,821 27,002 17,819	\$	44,698 27,892 16,806	
Increase in unrestricted net assets	16,544 Septer 2008	nber	25,348 30, 2007	
	2000		2007	
Current assets Total assets	\$ 61,585 238,902	\$	65,737 248,130	
Current liabilities Total liabilities	37,491 89,909		37,093 115,681	
Unrestricted net assets	148,993		132,449	

Construction Projects

The General is constructing a building that will house a relocated and expanded radiation oncology department, expanded emergency services, three levels of operating and procedure suites, and 150 neurosciences and medical oncology intensive care and acute care beds. In addition, space will be dedicated to a new sterile processing department and a central receiving dock. As of September 30, 2008, costs incurred in connection with the new building approximated \$85,104, with approximately \$197,100 in outstanding construction contracts. Planning and construction began in November 2006 and the total project cost is expected to be approximately \$686,000, with phased occupancy scheduled for 2011.

The General is developing a multi-specialty, state-of-the-art ambulatory care center (ACC), to be located in Danvers, Massachusetts. The goal is to create a convenient, patient focused, community-based setting for the delivery of sophisticated outpatient services. Current plans call for approximately 118,000 square feet of clinical space. Construction started in 2007, with approximately \$37,771 recorded in construction in progress as of September 30, 2008 and approximately \$21,534 in outstanding construction contracts. The total project cost is expected to be approximately \$84,000 with occupancy scheduled for 2009.

(dollars in thousands)

8. Pension and Postretirement Healthcare Plans

Substantially all employees of MGH and its affiliates are covered under The Massachusetts General Hospital Cash Balance Retirement Plan (MGH Plan), a noncontributory defined benefit pension plan. Benefits under the MGH Plan consist of annual allocations to participants' accounts based on the participant's employer, age, years of service and salary. Interest is credited to participants' accounts annually at market rates.

MGH also provides subsidized healthcare benefits for retired employees of the MGH and its affiliates on a self-insured basis. These benefits are administered through an insurance company and are accounted for on the accrual basis, which includes an estimate of future payments for claims incurred. The accrued postretirement benefit obligation for the General is not funded. The corresponding liability for the General at September 30, 2008 and 2007 was \$45,309 and \$46,827, respectively.

Certain professional staff employed by MGH and its affiliates who hold appointments at the Harvard Medical School, as well as certain administrative staff, participate in the MGH Academic Annuity Plan, which is a defined contribution plan. MGH and its affiliates contribute to the plan a percentage, as defined by the plan agreement, of each participant's annual compensation.

MGH and its affiliates use a measurement date of June 30 for their defined benefit pension and postretirement healthcare benefit plans.

The total expense allocated to the General consists of the following:

	Years Ended September 30,						
		2008		2007			
Defined benefit plan	\$	45,633	\$	50,418			
Defined contribution plan		23,659		21,248			
Postretirement healthcare benefit plan		4,472		4,414			
	\$	73,764	\$	76,080			

Benefit Obligations

	Defined Benefit Pension Plan				Postreti Healthcare I	 		
Change in Benefit Obligations		2008		2007	2008	2007		
Benefit obligations at beginning of year	\$	1,401,834	\$	1,257,188	\$ 52,452	\$ 51,487		
Service cost		73,797		69,847	1,668	1,611		
Interest cost		90,217		81,061	3,280	3,224		
Plan amendments		8,016		-	-	-		
Actuarial (gain) loss		(42,794)		42,484	(3,379)	(122)		
Benefits paid		(46,707)		(48,746)	(3,253)	 (3,748)		
Benefit obligations at end of year	\$	1,484,363	\$	1,401,834	\$ 50,768	\$ 52,452		

22

(dollars in thousands)

The accumulated benefit obligation for the defined benefit pension plan at the end of 2008 and 2007 was \$1,370,811 and \$1,280,682, respectively.

Weighted-Average Assumptions Used to		l Benefit on Plan	Postretirement Healthcare Benefit P			
Determine End of Year Benefit Obligation	2008	2007	2008	2007		
Discount rate	6.75%	6.25%	6.75%	6.25%		
Rate of compensation increase						
Professional staff	6.02%	6.02%	N/A	N/A		
Other than professional staff	5.05%	5.05%	N/A	N/A		
Healthcare cost trend rate for next year	N/A	N/A	9.00%	9.00%		
Rate to which the cost trend rate is to decline	N/A	N/A	5.00%	5.00%		
Year that rate reaches the ultimate trend rate	N/A	N/A	2017	2012		

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. A one-percentage-point change in assumed healthcare cost trend rates would have the following effect:

	_	entage-Point rease	One-Percentage-Point Decrease			
Effect on postretirement benefit obligation	\$	1,178	\$	(1,084)		

Plan Assets

	Defined Pensio	Postretirement Healthcare Benefit P				
Change in Plan Assets	2008	2007		2008		2007
Fair value of plan assets at beginning of year	\$ 1,433,620	\$ 1,203,086	\$	-	\$	-
Actual return on plan assets Employer contributions	43,295 63,343	217,416 61,864		3,253		3,748
Benefits paid	(46,707)	(48,746)		(3,253)		(3,748)
Fair value of plan assets at end of year	\$ 1,493,551	\$ 1,433,620	\$	-	\$	-

Subsequent to June 30, 2008 (measurement date), there has been significant volatility and illiquidity in the U.S. and global financial markets which has had a significant negative effect on the valuation of plan assets. However, the General is able to meet the obligations of the plans with existing plan assets or any additional contributions as may be required under federal pension regulations.

(dollars in thousands)

MGH and affiliates' defined benefit pension plan weighted-average target asset allocation ranges as well as actual allocations, by asset category for 2008 and 2007, are as follows:

	Target		ge of Plan sets
Asset Category	Allocation	2008	2007
Domestic equity securities	4% - 24%	14.5%	17.6%
Foreign equity securities	15% - 35%	20.2%	26.4%
Fixed income securities	1% - 21%	18.3%	14.5%
Less market sensitive strategies	20% - 40%	30.4%	27.9%
Inflation protection strategies	6% - 26%	16.6%	13.6%
	100%	100%	100%

Less market sensitive investments include hedge funds employing long/short equity, diversified arbitrage and absolute return strategies, which in the aggregate are expected to generate positive returns on a consistent basis. Inflation protection strategies include investments in real estate assets/commodities, equity securities of commodity related companies and inflation protection bonds.

The investment objective is to achieve the highest reasonable total return after considering (i) plan liabilities, (ii) funding status and projected cash flows, (iii) projected market returns, valuations and correlations for various asset classes, and (iv) Partners HealthCare's ability and willingness to incur market risk. Partners Healthcare's Investment Committee actively manages plan assets in order to add incremental returns by manager selection and asset allocation (increasing/decreasing allocations within allowable ranges based on current and projected valuations).

Funded Status

In September 2006, the Financial Accounting Standards Board issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* (SFAS 158). SFAS 158 focuses primarily on balance sheet reporting for the funded status of benefit plans and requires recognition of benefit liabilities for under-funded plans and benefit assets for over-funded plans, with offsetting impacts to unrestricted net assets.

SFAS 158 also requires companies to measure benefit plan assets and liabilities and determine the discount rate for subsequent year expense recognition as of the balance sheet date for financial reporting purposes, thus eliminating the opportunity to use a measurement date up to 90 days prior to the balance sheet date. The effective date for this change is 2009. MGH and affiliates currently use a June 30 measurement date and will adopt a September 30 measurement date in 2009 as required. Converting to the new measurement date will require a one-time adjustment to unrestricted net assets per the transition guidance in SFAS 158.

(dollars in thousands)

The funded status of the plans recognized in the consolidated balance sheets of MGH and its affiliates and the related amounts recognized in unrestricted net assets, follows:

	Defined Benefit Pension Plan			Н	irement Benefit Plan			
End of Year		2008		2007		2008		2007
Fair value of plan assets at measurement date Contributions received after measurement date	\$ 1	,493,551 15.521	\$ ^	1,433,620 16.757	\$	- 828	\$	- 771
Benefit obligations at measurement date	(1	,484,363)	(1,401,834)		(50,768)		(52,452)
Funded status	\$	24,709	\$	48,543	\$	(49,940)	\$	(51,681)

Amounts recognized in the consolidated balance sheet of MGH and Affiliates consist of:

	Defined Benefit Pension Plan				Postretirement Healthcare Benefit			
	2008		2007		2008	2007		
Noncurrent assets	\$ 24,709	\$	48,543	\$	-	\$	-

(dollars in thousands)

Weighted-Average Assumptions Used to Determine Net Periodic Pension and			Postretirement Healthcare Benefit Plan		
Postretirement Cost	2008	2007	2008	2007	
Discount rate	6.25%	6.25%	6.25%	6.25%	
Expected return on plan assets	8.25%	8.25%	N/A	N/A	
Rate of compensation increase					
Professional staff	6.02%	6.02%	N/A	N/A	
Other than professional staff	5.05%	5.05%	N/A	N/A	
Healthcare cost trend rate for this year	N/A	N/A	9.00%	9.00%	
Rate to which the cost trend rate is to decline	N/A	N/A	5.00%	5.00%	
Year that rate reaches the ultimate trend rate	N/A	N/A	2012	2011	

Partners HealthCare considers multiple factors in establishing a multi-year projected return assumption for its benefit programs. These include, but are not limited to: its current asset allocation policy and target ranges by asset class; asset valuations; historical and projected rates of return by asset class; historical and projected correlations among asset classes; the opportunity to exceed passive index returns via active management through a combination of manager selection and alternative weightings among and within asset classes; and Partners HealthCare's historical performance experience.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effect:

	One-Percentage-Point Increase		One-Percentage-Point Decrease		
Effect on service and interest cost	\$	75	\$	(70)	

9. Professional Liability Insurance

The General insures substantially all of its professional and general liability risk on a claims-made basis in cooperation with PHS affiliates and other organizations in the Greater Boston area through a captive insurance company, Controlled Risk Insurance Company Ltd. (CRICO). The policy covers claims made during its term, but not those occurrences for which claims may be made after expiration of the policy, except for certain tail liabilities which CRICO has assumed on an occurrence basis through December 31, 2008. Management intends to renew its coverage on a claims-made basis and has no reason to believe that it will be prevented from such renewal.

The General follows the accounting policy of establishing reserves to cover all professional liability claims incurred but not reported to the insurance company as of the end of the year (tail liability), excluding the tail liability assumed by CRICO. These reserves have been estimated by consulting actuaries on a discounted basis using an interest rate of 5.75% at September 30, 2008 and 2007.

Management is not aware of any claims against the General or factors affecting CRICO that would cause the expense for professional liability risks to vary materially from the amount provided.

(dollars in thousands)

10. Transactions with Affiliates

The General received fund-raising, investment management, legal, financial and administrative services from PHS and MGH of \$164,093 and \$149,387 in 2008 and 2007, respectively. The General also purchased certain teaching and administrative services from PHS affiliates, which amounted to \$66,813 and \$61,635 in 2008 and 2007, respectively. The General provided certain administrative services and support primarily to PHS and affiliates, which totaled \$22,393 and \$22,793 in 2008 and 2007, respectively. For the years ended September 30, 2008 and 2007, Spaulding and FRC, Inc. received payments from the General of \$8,382 and \$7,050, respectively, as additional reimbursement for patients transferred from the General and cared for at Spaulding and FRC, Inc. All services among these affiliated corporations were reimbursed on an estimated cost basis.

During 2008 and 2007, the General transferred funds to, and received funds from, certain affiliated corporations. These equity transfers are reported separately as changes in net assets and are excluded from excess of revenues over expenses. Amounts transferred were as follows:

	Years Ended September 30,			
		2008		2007
Transfers from (to)				
MGH	\$	(20,194)	\$	1,075
MGPO		(94)		475
PHS		2,899		111
North End Community Health Committee, Inc.		-		(362)
Royalty transactions transfer to MGH (Note 14)				(206,000)
		(17,389)	'	(204,701)
Transfer to MGH of assets released from restrictions		-		(74,726)
Liability transfer from PHS		_		(6,610)
Transfers to affiliates, net	\$	(17,389)	\$	(286,037)

During 2007, assets of \$74,726 that were previously temporarily restricted, were released from restriction and transferred to MGH.

(dollars in thousands)

11. Concentration of Credit Risk

Financial instruments that potentially subject the General to concentration of credit risk consist of patient accounts receivable, research grants receivable, pledges receivable and certain investments. The General receives a significant portion of its payments for services rendered from a limited number of government and commercial third-party payers, including Medicare, Medicaid, Blue Cross and Blue Shield of Massachusetts, Harvard Pilgrim Health Care and Tufts Associated Health Plan. Research funding is provided through many government and private sponsors. Pledges receivable are due from multiple donors. The General considers the credit risk for pledges to be minimal based on history and the financial wherewithal of donors, most of which are individuals or organizations well known to the hospital. Investments, which include government and agency securities, stocks and corporate bonds, and private partnerships and other investments are not concentrated in any corporation or industry or with any single counterparty.

12. Restricted Net Assets

Restricted net assets are available for the following purposes:

	September 30,			
		2008		2007
Temporarily restricted				
Charity care	\$	92,655	\$	114,928
Buildings and equipment		83,464		55,170
Clinical care, research and academic		363,331		432,797
	\$	539,450	\$	602,895
Permanently restricted				
Charity care	\$	13,974	\$	10,926
Clinical care, research and academic		142,239		136,922
	\$	156,213	\$	147,848

13. Functional Expenses

Total operating expenses by function are as follows:

	Years Ended					
	Septe	September 30,				
	2008	2007				
Healthcare services	\$ 1,507,485	\$ 1,441,956				
Research and academic	625,365	582,694				
General and administrative	214,713	190,657				
	\$ 2,347,563	\$ 2,215,307				

(dollars in thousands)

14. Royalty Transactions

During 2007, the General sold its future right to receive royalties on sales of the drug ENBREL® outside North America. The transaction involved a one-time payment to entitle the purchaser to receive royalty payments on sales of ENBREL® outside North America going forward. Under the terms of the agreement, the General received approximately \$213,000 in net proceeds, which included approximately \$4,000 of accrued royalty revenue (of which the General recognized approximately \$1,000 in operating revenue and MGH recognized approximately \$3,000 in nonoperating income). Of the remaining proceeds of approximately \$209,000, approximately \$206,000 has been recognized by the General in nonoperating gains as a component of gifts and other and approximately \$3,000 has been recognized by MGH in nonoperating income. The proceeds are net of a payment of approximately \$71,000 to the drug's inventor, who is an employee of the MGPO, in accordance with established policies of the General. Prior to the sale of the royalty rights, the General received royalty payments on sales of ENBREL® outside North America and recognized operating revenue of \$2,369 in 2007 with \$7,949 recognized in nonoperating income at MGH.

15. Contingencies

The General is subject to complaints, claims and litigation which have risen in the normal course of business. In addition, the General is subject to reviews by various federal and state government agencies to assure compliance with applicable laws, some of which are subject to different interpretations. Recently, governmental review of compliance by healthcare institutions, including the General, has increased.

The General Hospital Corporation Notes to Schedule of Expenditures of Federal Awards September 30, 2008

1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards includes the federal grant transactions of The General Hospital Corporation (the "Hospital") recorded on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in or used in the preparation of the basic financial statements. Negative amounts represent adjustments to amounts reported as expenditures in prior years. Pass-through numbers are provided where available.

2. Facilities and Administrative Costs

The predetermined facilities and administrative cost rates were based on financial information submitted utilizing the method prescribed in OASC-3. The Hospital negotiated and was awarded a predetermined facilities and administrative cost rate for the period October 1, 2007 through September 30, 2008 of 75% for on-site research and 26% for off-site research. Fringe benefit rates for the period October 1, 2007 through September 30, 2008 range from 10% to 35%.

3. Stafford Loan Program

During the fiscal year ending September 30, 2008, the Hospital processed \$107,464 in new loans under the Stafford Loan Program (CFDA number 84.032), granted by the Department of Education.

4. Subrecipients

During fiscal 2008, the Hospital provided to subrecipients in the Research and Development and Research Training Cluster \$45,219,541 as follows. These amounts are included in the accompanying Schedule of Expenditures of Federal Awards:

Acenta Discovery, Inc.	\$ 9,527

Part II Reports on Compliance and Internal Controls

Report of Independent Auditors on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Board of Trustees of The General Hospital Corporation

We have audited the financial statements of The General Hospital Corporation as of and for the year ended September 30, 2008, and have issued our report thereon dated December 19, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control over Financial Reporting

In planning and performing our audit, we considered The General Hospital Corporation's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of The General Hospital Corporation's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of The General Hospital Corporation's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether The General Hospital Corporation's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We also noted certain matters that we reported to management of The General Hospital Corporation in a separate letter dated December 17, 2008.

This report is intended solely for the information and use of The General Hospital Corporation's Board of Trustees, management, federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

TRuewaterhouse Coopers JDP

Report of Independent Auditors on Compliance with Requirements Applicable to Each Major Program and on Internal Control Over Compliance in Accordance with OMB Circular A-133

To the Board of Trustees of The General Hospital Corporation

Compliance

We have audited the compliance of The General Hospital Corporation with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended September 30, 2008. The General Hospital Corporation's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of The General Hospital Corporation's management. Our responsibility is to express an opinion on The General Hospital Corporation's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about The General Hospital Corporation's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of The General Hospital Corporation's compliance with those requirements.

In our opinion, The General Hospital Corporation complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended September 30, 2008. However, the results of our auditing procedures disclosed an instance of noncompliance with those requirements, which is required to be reported in accordance with OMB Circular A-133 and which is described in the accompanying schedule of findings and questioned costs as item 08-1.

Internal Control over Compliance

The management of The General Hospital Corporation is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered The General Hospital Corporation's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly we do not express an opinion on the effectiveness of The General Hospital Corporation's internal control over compliance.

A control deficiency in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

The General Hospital Corporation's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. We did not audit The General Hospital Corporation's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of The General Hospital Corporation's Board of Trustees, management, and federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

Part III

Findings

The General Hospital Corporation Schedule of Findings and Questioned Costs Year Ended September 30, 2008

There were no findings noted in the current year.

I. Summary of Auditor's Results

Financial Statements

II.

Type of auditor's report issued	Unqualified
Internal control over financial reporting Material weakness(es) identified? Significant deficiency(ies) identified that are not	yes <u>X</u> no
considered to be material weaknesses?	yes <u>X</u> none reported
Noncompliance material to financial statements noted?	yes <u>X</u> no
Federal Awards	
Internal control over major programs Material weakness(es) identified? Significant deficiency(ies) identified that are no	yes <u>X</u> no
considered to be material weaknesses?	yes <u>X</u> none reported
Type of auditor's report issued on compliance for major programs	Unqualified
Any audit findings disclosed that are required to be reported in accordance with section 510(a) of Circular A-133?	<u>X</u> yes no
Identification of Major Programs	Name of Federal Program or Cluste
Various CFDA numbers	Research and Development and Research Training
Dollar threshold used to distinguish between Type A and Type B programs	\$3,000,000
Auditee qualified as low-risk auditee?	<u>X</u> yes no
Financial Statement Findings	

The General Hospital Corporation Schedule of Findings and Questioned Costs Year Ended September 30, 2008

III. Federal Award Findings and Questioned Costs

Research and Development and Research Training Cluster

Army (CFDA #12.420) (various award numbers and award years).

08-1 Reporting

Criteria

OMB Circular A-110 Section 52(1)(iv) requires submission of annual, final, and quarterly Financial Status Reports ("FSR") to the sponsoring agency according to terms set forth in the grant or contract agreement.

Condition

We noted deterioration in the timeliness of non-NIH related FSRs in the current year. The Hospital received several U.S. Army awards (CFDA#12.420), which have quarterly submission requirements. More specifically, of the 112 Army FSRs due to be submitted within the fiscal year, there were 54 quarterly reports submitted late on an average of 142 days late and within a range of 3 to 375 days late.

Cause

The U.S. Army FSRs were filed late primarily due to significant unforeseen key reporting staff turnover experienced in fiscal 2008. This turnover involved those individuals largely responsible for U.S. Army report submissions. There was also a failure to track the submission of FSRs for a number of U.S. Army awards during the fiscal year.

Effect

The late submission of reports can result in the related federal agencies receiving untimely information on awards granted to the Hospital. This can ultimately affect the agencies ability to make future funding decisions regarding these awards.

Recommendation

We recommend that the Hospital review its existing tracking mechanisms for non-NIH FSRs and explore opportunities to automate this process going forward. Further, although we acknowledge that the turnover issues experienced by the Hospital in the current year is considered an anomaly, we encourage the Hospital to re-review its current reporting function to ensure that Research Finance remains well positioned to monitor and ensure timeliness of all FSRs despite instances of staff vacancies.

Management's Views and Corrective Action Plan

Following this finding is management's views and corrective action plan.

Management's View and Corrective Action Plan for the Fiscal Year Ended September 30, 2008

08-1 Reporting

The Hospital agrees with the auditors' recommendations. The Hospital is in the process of converting all non-NIH financial reporting requirements into our grants management system. Research Finance expects to complete the transition into the new system during the second quarter of fiscal year 2009.

The Hospital agrees that the turnover issues in the current year are an anomaly and has taken the necessary steps to realign the reporting functions to ensure the timely submission of financial reports.

Kathleen Judge

Chief Operating Officer

The General Hospital Corporation Summary Schedule of the Status of Prior Audit Findings Year Ended September 30, 2008

There were no findings from prior years to update.
